Additional Capabilities

At SunOpta Food Solutions, we are continuously expanding our capabilities in order to offer our clients the leading edge in product development and brand loyalty. Our highly skilled R&D teams can assist in developing unique products, flavors and textures ideally suited for your target market. Our experienced sales and marketing professionals will provide superior start to finish support in launching your organic and natural specialty product lines.

Quality & Sustainability Programs

We conduct vendor audits of farms and production facilities that verify proper controls are in place to maintain the integrity of the organic supply chain.

Review and verify 3rd party audits.

SunOpta can confidently assure that product supplied to the North American market meets all the USDA NOP requirements.

The SunOpta family is comprised of a number of enterprises previously built and developed by industry pioneers. Driven by our commitment to the health and well-being of our customers, communities and the environment, we manage our business with strongly held values and maintain high quality and certification standards throughout the entire process. Our largest operating group, SunOpta Foods, has grown to become a leader in the sourcing, processing and distribution of natural and organic food products with a focus on sustainable business practices and vertically integrated business models from seed through packaged products.
