

OptaVantage™ by SunOpta™

Direct
grower
connection...
superior
agronomics

With more than 60 years of combined experience, SunOpta™ holds strong ties to the grower market and understands the importance of agriculture in the economy. Our long-standing relationship with growers has allowed us to become leading producers, suppliers and ingredient developers for the food industry. As a leading producer and supplier of non-GMO and organic food products, we understand that consumers are more aware of their food source and environment. Through OptaVantage™, SunOpta is helping farmers increase their acreage, drive sustainability and create healthier products for the food industry.

Our agronomists work directly with farmers to provide the highest quality genetics and expertise. We develop customized programs for organic, identity preserved (IP) and non-GMO crops. We ensure the success of our farmers by offering high quality genetics, superior operations, world class customer service and a competitive sales program.

We're partners, from seed to finished product, every step of the way.
