Organic Dairy Ingredients

SunOpta™, recognized worldwide as a leading producer and supplier of organic ingredients with over 25 years experience, offers a complete line of USDA certified organic dairy ingredients. From non-fat milk and crème powdered products to superior tasting cheese and snack powders to organic whey ingredients, SunOpta controls each step of the sourcing, production and development to provide a stable supply of innovative organic dairy ingredients.

The goodness of milk is well known. Milk is a nutritious food, rich in proteins, minerals, fats and enzymes. The organic dairy products SunOpta offers are all made from milk produced by cows fed Certified Organic feed, without the use of prohibited growth hormones or antibiotics and then processed in strict USDA inspected plants to ensure safe, stable supply.

In response to customer demand, SunOpta has established a complete program for organic dairy ingredients, designed to overcome the previous industry problems of inconsistent quality, lack of flavor and limited availability. The SunOpta team of experts of animal husbandry specialists, dairy scientists and flavor chemists have created the finest quality organic dairy ingredients, guaranteed to enhance your product's functionality, nutrition, texture and taste.

Our technical services team can work with you to refine one of our existing ingredient formulations, or develop a new custom product specifically for your application. All of our plants are Certified Organic and audited by the American Institute of Baking—ensuring quality, safety, and organic compliance.

FUNCTIONALITY

- Improved flavor quality in organic foods
- Dairy is a complete protein
- Dairy is a high protein source

FEATURES AND BENEFITS

- Certified Organic—allowing for organic labeling
- Produced from cows not treated with synthetic bgh
- Grade A (for non-fat milk & cream ingredients)
- Domestically produced, resulting in cost & logistics benefits
